- **A.** The Predatory Behavior Management Program (PBMP) is intended to reduce predatory behavior in the NMCD population.
- **B.** The PBMP will provide treatment to offenders who have demonstrated the inability to habilitate themselves through programs offered in general population and have engaged in predatory behavior.
- **C.** Predatory Behavior Management Committees will be held in lieu of TAP committees due to the more intensive and enhanced supervision and programming received while in PBMP.
- **D.** Lump Sum Awards will not be granted for PBMP programs except where mandated by statute.
- **E.** Time Frames specified in this policy may be extended under <u>extenuating circumstances</u> with documented approval by the Director of Adult Prisons.
- **F.** Identification of Mental Health Needs and Provisions of Services:
  - 1. NMCD will use established screening criteria to identify inmates who should be excluded from placement in Regular Predatory Behavior Management Housing on the basis of their mental health status. Such inmates may be located in the PBMP APA.
  - 2 For those inmates placed in Predatory Behavior Management Housing, NMCD will provide mental health and psychiatric treatment to inmates with special needs and identified as needing such services, pursuant to NMCD Behavioral Health Policies. [2-CO-4B-04]
  - A qualified mental health professional shall personally interview and prepare a written report on any inmate remaining in restrictive housing or PBMP for more than *thirty* (30) *days*. If confinement continues beyond *thirty* (30) *days*, a mental health assessment by a qualified mental health professional shall be made at least every three months or more frequently if prescribed by the chief medical authority. [4-4256]

- 4 Mental Health services for PBMP inmates assigned to the PBMP APA are specified in Policy (CD-180400), (Mental Health Screening and Services for Predatory Behavior Management Inmates) and Policy (CD-180500), (Predatory Behavior Management APA Mental Health and Related Services for Predatory Behavior Management Inmates).
- G. Predatory Behavior Management housing units provide living conditions that approximate those of the general inmate population; all exceptions are clearly documented. Cells/rooms permit the inmates assigned to them to converse with and be observed by staff members. [4-4140]
- **H.** All cells/rooms in Predatory Behavior Management provide a minimum of eighty (80) square feet, and shall provide (35) square feet of unencumbered space for the first occupant and 25 square feet of unencumbered space for each additional occupant. [4-4141][4-4133]
- I. All Predatory Behavior Management inmates shall be personally observed by a correctional officer at least **every 30 minutes** on an irregular schedule. Inmates who are violent or mentally disordered or who demonstrate unusual or bizarre behavior shall receive more frequent observation; suicidal inmates shall be under continuous observation. [4-4257]
- J. Inmates in PBMP will have a status review by the classification committee or other authorized staff group every seven (7) days for the first two (2) months and at least every thirty (30) days thereafter to determine whether the reasons for the placement still exist. The status reviews will be completed using the **7 and 30 Day Review** form (*CD-141001.4*). [4-4253]
- **K.** All inmates in Predatory Behavior Management shall be provided prescribed medication, clothing that is not degrading and access to basic personal items for use in their cells unless there is imminent danger that an inmate or any other inmate(s) will destroy an item or induce self-injury. **[4-4261]**
- L. Inmates in Predatory Behavior Management shall have the opportunity to shave and shower at least three (3) times per week. [4-4262]
- M. Inmates in Predatory Behavior Management shall receive laundry, barbering, and hair care services and are issued and exchange clothing, bedding, and linen on the same basis as inmates in the general population. Exceptions are permitted only when found necessary by the senior officer on duty; any exception is recorded in the unit log and justified in writing. [4-4263]
- N. Alternative meal service may be provided to an inmate in Predatory Behavior Management who uses food or food service equipment in a manner that is hazardous to self, staff or other inmates. Alternative meal service is on an individual basis, is based on health or safety considerations only, meets basic nutritional requirements, and occurs with written approval of the warden and responsible health authority. The substitution period shall not exceed seven (7) days. [4-4264]

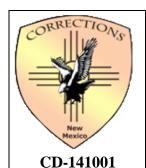

- 0. Whenever an inmate in Predatory Behavior Management is deprived of any usually authorized item or activity, a report of the action is filed in the inmate's case record and forwarded to the chief security officer. [4-4265]
- P. Inmates in Predatory Behavior Management can write and receive letters on the same basis as inmates in the general population. [4-4266]
- Inmates in Predatory Behavior Management shall have opportunities for visitation unless Q. there are substantial reasons for withholding such privileges. [4-4267]
- R. Inmates in Predatory Behavior Management shall have access to reading materials and legal materials. [4-4268][4-4269]
- S. Inmates in Predatory Behavior Management shall receive a minimum of one hour of exercise per day outside their cells, five (5) days per week, unless security or safety considerations dictate otherwise. [4-4270]
- T. Inmates in Predatory Behavior Management shall be allowed telephone privileges. [4-42711
- U. When an offender is transferred to Predatory Behavior Management, health care staff will be informed immediately and will provide a screening and review as indicated by the protocols established by the health authority. Unless medical attention is needed more frequently, each offender receives a daily visit from a qualified health care professional. The visit ensures that offenders have access to the health care system. The presence of a health care provider in restrictive housing is announced and recorded. The frequency of physician visits to restrictive housing units is determined by the health authority. [4-4400]
- V. The department provides a system that identifies and monitors the movements and activities of inmates who pose a significant concern to the safety, security, and orderly management of correctional institutions. This system should ensure that appropriate staff is made aware of these inmates, and that procedures exist to ensure information is current and communicated in a timely fashion. [4-4312-1]
